Community Interest Company

SECTION A: COMMUNITY INTEREST STATEMENT – beneficiaries

1. We/I, the undersigned, declare that the company will carry on its activities for the benefit of the community, or a section of the community². [Insert a short description of the community, or section of the community, which it is intended that the company will benefit below]
1³

The company's activities will provide benefit to the general public, through carrying out programs in relation to electronic health records ("EHRs"), to improve the quality of healthcare and research in the area of the standardisation of open, cost-free clinical records. The company will work to facilitate the creation and implementation of EHRs, and will work with a range of stakeholders to do this.

One of the priorities of the company is ensuring that EHR platforms benefit patients using the health service, as well as engaging physicians to improve access to information, for example.

As well as assisting patients and members of the public, the company will also provide benefit to others working in research and development in this field, through access to expertise and intellectual property.

The eventual aim of the Company's various work streams and activities is therefore to ensure the effective implementation of EHRs in a way which improves the standard and quality of healthcare, and ensures that patients and physicians alike are able to access information in a clear and efficient manner. As a result, this will benefit not only physicians and others working in the healthcare industry in carrying out their roles, but all patients of the

SECTION B: Community Interest Statement – Activities & Related Benefit

Please indicate how it is proposed that the company's activities will benefit the community, or a section of the community. Please provide as much detail as possible to enable the CIC Regulator to make an informed decision about whether your proposed company is eligible to become a community interest company. It would be useful if you were to explain how you think your company will be different from a commercial company providing similar services or products for individual or personal gain.

Activities (Tell us here what the company is being set up to do)	How will the activity benefit the community? (The community will benefit by...)
The company will develop rigorous, open specifications for EHRs, validated by implementation. The company will also develop clinical models and implementation projects and open-source software and tools. The company will also participate in international standards development.	The community will benefit by open and cost-free access to these specifications and open-source software, which will benefit those working in research and development in this field, and ultimately physicians and patients. Through the company's work on open and cost-free clinical models and implementation projects, the community will benefit by EHRs being used more widely, which will ultimately result in an improved experience for patients and a higher standard of healthcare. Unlike a commercial company, the company will not charge for access to much of its intellectual property, in order to facilitate collaboration and research in this field, with the eventual aim of an improved system for patients and physicians alike.
Advocacy and information around EHRs.	The community will benefit by receiving more information around EHRs and their purpose and implementation, which again will ultimately benefit patients and physicians.

If the company makes any surplus it will be used for continuing and expanding its work on the various work streams and programs in relation to EHRs which the company is currently carrying out.
